• Design and specifications are subject to change without notice.

- The screen and monitor images and comparison photos in this catalog are simulations.
- LCD panels, polarizers and other optical components and cooling fans may need replacement after prolonged usage. For more details, please consult a Hitachi sales representative.
- Do not use in places where there is a lot of water, dampness, steam, dust, soot or tobacco smoke. This may result in fire or malfunction.
- Optical components (lamp, LCD panel, polarizing plate, PBS [polarizer beam splitter], contrast-up film) have limited service lives. They must be repaired or replaced if they are used for a long period of time.
- These projectors use a mercury lamp with high internal pressure. Because of its properties, this lamp may burst with a loud noise or burn out if struck or after it has been used for a period of time. The time until it bursts or burns out varies greatly according to difference between lamps and usage conditions. Turning the lamp's power on and off frequently shortens its service life.
- Optical components other than the lamp: If the projector is used for six hours or more per day, they may need to be replaced in less than a year.
- LCD panel: If the projector is used continuously for six hours or more, its replacement cycle may be shortened.
- Do not turn projector on again for ten minutes after shutdown. Neglect can shorten the lifetime of the lamp. During use and immediately after use, do not touch anywhere near the lamp and the vents as these parts are extremely hot.

LCD Projectors

CP-X705
CP-X807

Advanced functions make these projectors effective for use in conference rooms, lecture halls and other mid to large-size spaces.

Convenient Ceiling Mounting:
Superior Maintainability

Excellent Performance:
High Quality Presentation
Capabilities

Easy Use Without Worry:
Higher Security and
Easier Operation

Convenient Ceiling Mounting: Superior Maintainability

■ Manual Lens Shift

The lens can be moved manually to shift the position of the image, which can be moved 9cm (3-9/16") to the left and right, and 50cm (19-11/16") up and down on a 70" screen. Fine adjustments after ceiling installation can be done with a screwdriver.

■ Easy Replacement of Lamp and Filter

The lamp cover is on the top of the projector and the filter is on the side. Even when mounted on the ceiling, the lamp or filter can be easily replaced. Maintenance is more convenient and faster.

Lamp door on top

Filter on side

■ High Performance Air Filter

The air filter uses Electret Air Filter charged fibers to efficiently filter out dust so performance does not suffer even in dusty environments.

■ Projector Monitoring and Control from a Remote Location*

One computer can monitor and control the functions of a single projector or as many LAN-connected projectors as are needed.

■ E-mail Alert*

The projector diagnoses possible trouble and sends an E-mail Alert to ten designated e-mail addresses.

■ Scheduling Function*

On/off timing can be set for automatic operation from a computer. For example, set power-on to coincide with the start of a lesson.

■ Still Image and Motion Image Transfer

By using the MIU Live Viewer software, the CP-X807 can transmit both moving and still images (no limitations on number) via wired LAN.

* The CP-X705 can transmit four still images.

■ Control and Monitoring via Web Browser

By inputting the projector's IP address into your browser, you can perform almost all functions from the menu without installing software, in both wired and wireless configurations.

CP-X807

Excellent Performance: High Quality Presentation Capabilities

■ High Brightness of 5,000 ANSI Lumens*

The CP-X807 delivers extremely high brightness of 5,000 ANSI Lumens. In large conference rooms and lecture halls, it can project large screens that are sharp and easy to watch.

* CP-X705 achieves 4,500 ANSI Lumens.

■ Extensive Connectivity

Numerous input terminals allow connectivity with a variety of video sources. The HDMI terminal allows digital signals to be transmitted in the digital domain, providing images of beautiful quality. These projectors also have an SD card slot.

* The USB storage (AUX I/O) terminal only supports USB storage devices. Compatibility with all USB storage devices is not guaranteed.

■ Quick Connection

With the convenient MIU Live Viewer software, you can easily set up a wired or wireless environment.

- Windows Vista™ can only be used in manual mode.
- SD wireless card is an optional for the CP-X807.

■ Presenter Mode [CP-X807]

When the projector is connected to multiple computers on a network, the output from one specific computer can be set as the projected image. Images from other computers will not be unexpectedly projected, so there is no chance of them interfering with the presentation.

■ Wireless Presentation and Multi-Screen for Conferences [CP-X807] Compatible with Windows Vista™

There's no need to connect the projector to a computer via a cable, making it much quicker to start presentations and lessons. In addition, images from four computers can be displayed at the same time by wireless control for more effective presentations. The Display User Name function in the Menu allows user names to be displayed for each computer, so it is easy to tell whose image is being displayed.

Cable connection unnecessary.

Four images on one screen.

■ High Image Quality

The CP-X807 and CP-X705 have a variety of functions to improve the images that they project. Thanks to Motion Adaptive Progressive Scan, 3:2 Pull Down, Noise Reduction, Equalizing Gamma and 3D Y/C Separation, you can even project moving pictures with beautiful clarity.

■ Active Iris

In addition to a high 1000:1 contrast ratio, these projectors feature an Active Iris that is automatically controlled to ensure best image contrast and depth perspective during both bright and dark scenes.

Bright scene

Dark scene

■ Built-in 16W Speakers SRS WOW

The CP-X807/CP-X705 have four speakers (2-ch.) with a high output of 4W. You get 16W of total output without the need to connect external speakers. And thanks to SRS WOW*, the sound is both dynamic and clear.

* SRS WOW is a trademark of SRS Labs, Inc.

Easy Use Without Worry: Higher Security and Easier Operation

■ Hitachi Unique Technology Transition Detector Prevents Unauthorized Use

This Hitachi security function is engaged when the projector angle or setting are changed from the installed position. Even if someone takes it without authorization, that person cannot use it.

■ My Button Lets You Set Your Favorite Functions

To make operation even faster and more convenient, the projectors have two My Buttons. You can program these buttons with any command in the Select menu, giving you fast access to two often-used functions.

■ PIN Lock and My Screen PIN Lock

PIN Lock ensures that only those who know the PIN can use the projectors. My Screen PIN Lock locks in an image as the startup screen, such as a school name or company logo.

PIN Lock

My Screen PIN Lock

■ Security Bar

An improved Security Bar allows easy attachment to a convenient place by a cable or chain. There is also a Kensington security slot for using a lock to attach a cable.

■ My Text

My Text lets you put text on the startup screen according to your needs, such as model name, serial number or location information.
